**For details and pricing please call:**

**CARF-Models: +49 6151 9179 156**

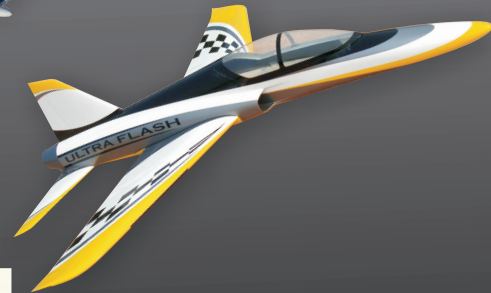

**Poeting: +49 2734 40833**

## HELP!!! Maiden Flight!!!

"Feeling good, feeling safe, feeling confident, feeling protected during the Maiden Flight of my new investment!" That's what all model pilots seem to wish. Especially when the plane in question is a very special one: A CARF-model. But the reality is often different. Did I install everything correctly? Will the engine run reliably? Will I keep my nerves under control? These questions can give even the most experienced pilot sleepless nights.

CARF-Models has realized the huge responsibilities manufacturers of high end models have for the ultimate success of their customers. It's the next level of SERVICE. Because only the one who can safely and confidently fly these beautiful pieces of technology, can truly enjoy them.

Bring your new pride and joy to our event and let us help you with your maiden flight. Or test fly a planned new project before you commit to purchase. Or train a few hours efficiently on your new airplane with professional trainers of the CARF-Models and Poeting Flight School team, at a Jet-Rookie-Meeting proven airfield.

The experienced Sport Flyer's Club Darmstadt (Ober-Ramstadt) held already several "ROOKIE-Meetings" on their perfect 300m long grass runway...
